

SYNERGY

by AEGIS GRAVITAS

AI built for environments where *duty of care* is required.

FIDUCIARY AI

Every commercial AI disclaims liability for its outputs. Professionals operating under fiduciary duty cannot deploy these tools without absorbing all risk themselves. Synergy changes that. It produces warranted decisions with traceable reasoning, confidence scoring, and cryptographic audit integrity.

WHAT MAKES IT DIFFERENT

Warranted Output

Not suggestions. Not disclaimers. Synergy delivers decisions it can stand behind — or it formally abstains.

Cryptographic Audit Trail

Every decision is sealed by the Omega Ledger. The reasoning chain is traceable and tamper-evident.

Formal Abstention

When the system cannot warrant a conclusion, it does not invent one. This is not a refusal. It is an integrity guarantee.

You get a **sealed decision report**
you can defend. Every time.

INTELLECTUAL PROPERTY

US Provisional Patent #63/943,958

Filed December 18, 2025

Sole Inventor: David Joel Stephens

DEMO AVAILABLE

Private demonstrations available for professionals operating under duty of care.
